

I beleve there is no reason that my privicy and famly life should be inturepted by a telemarketer. I pay for the privilage of having a phone in my home to keep in touch with my famly and frends and not to have my dinner inturpted at dinner time. New Jersey"s Telephone Comsurmer Protection Act should not be weakened at all. I think the national act should be improved. In fact I think all of these protection acts should include e-mail Spam. After all, we consumers pay for this service, it is not given to us, it is not public air space, We pay for it and should have the right to limit the use of a convenince that we pay for. In short we should not have to pay for a service so that another person can extort money from the not so well informed or to bother us in the process. It is time for the people to have the privileges granted to us under the constution insted of giving thoes who would even take more rights from us by bying out the votes of thoes who we select to govern us. These are sad times for the people of the us with our privicy being chalange for profit of a few.
